

BRETHREN'S ALMANAC

FOR THE YEAR OF OUR LORD

1876.

Being a Bissextile or Leap Year, and
until the 4th of July, the 100th of
American Independence.

PUBLISHED BY
H. B. BRUMBAUGH & Bro., Huntingdon, Pa.,
— AND —
J. QUINTER, Myersdale, Pa.

ASHLAND POULTRY YARDS.

E. J. WORST, Ashland, Ohio.

Breeder of all the leading Varieties of Pure bred Poultry and Berkshire Pigs.

My Fowls and pigs are all bred pure and healthy, and are colonized on a farm of over 200 acres, each variety occupy a separate run, and are bred from the best and most noted Strains in America.

Brethren, it costs no more to keep good fowls and good pigs that will pay you from fifty to one hundred per cent. better than to keep poor ones, or such whose good qualities have been lost by long and continual in and in breeding. While the satisfaction alone of having fine stock to care for is worth the reasonable price asked.

I shall during the coming season sell Fowls, Pigs and Eggs to Brethren at from twenty-five to fifty per cent. less than to other parties, having been well patronized by them the past season. I feel to thank them for the interest they have manifested in my business, and shall henceforward make the breeding of fine poultry and pigs, a *Brethren's Specialty*.

I can assure all those who wish to improve their fowls, the coming season, that I can ship eggs to any part of the United States in perfect safety, packed in my new safety package, which I can guarantee to hatch just about as well as if set at home. I have shipped eggs and tows the past season to nearly every state and territory in the Union with such success that it is hardly equaled by any other breeder in America. Eggs hatching on an average just as well as those set at home, in many cases every egg hatched. Some packages traveling over 4,000 miles by rail and water. For want of space I will give but few of the many testimonials as sent to me by brethren and others, using their own language.

Buffalo, Colorado, July 5th, 1875.

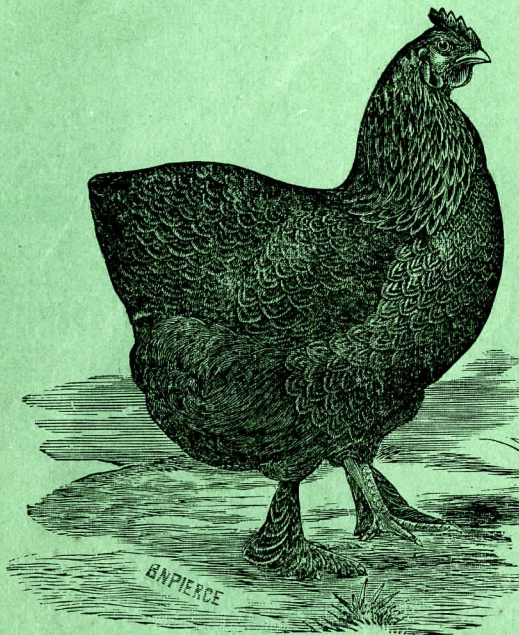

Bro. E. J. WORST: The 12 Leghorn eggs you sent me all hatched. Your manner of packing is certainly a success. The eggs traveled over 1,400 miles by rail.

Yours Truly, A. E. TROYER.

Bannack City, Montana Territory, June 29th, 1875.

E. J. WORST: The setting of eggs you sent me came all right, and hatched 9 chicks which are now sporting among the hills of Montana. They traveled over 2,100 miles by rail and stage.

Yours, ELI MURRAY.

Hill Valley, Pa., May 3rd, 1875.

E. J. WORST: From the setting of eggs you sent me we have 13 fine chicks which are fully up to our expectation.

Yours, JOHN SPANOGLE.

April 26th, 1875.

E. J. WORST:

Dear Bro. From the 15 cochins eggs you sent me we have 12 fine chicks, and one dead one, the other two eggs were broken by the hen. I am satisfied that every egg would have hatched had they not got broken.

Yours, D. P. Saylor.
Double Pipe Creek, Md.

May 22nd, 1875.

E. J. WORST:

The 26 eggs you sent me came all right. I must give you credit for sending the best packed eggs I ever saw, I would warrant them to go to China and hatch well if too much time was not lost in their passage. From the 26 eggs 25 chicks hatched, the 26th one died in the shell.

Yours, GEO. I. SIMONS.
Ontario, Canada.

May 8th, 1875.

E. J. WORST:

From the 13 eggs you sent me we have 12 fine chicks. I can recommend your careful manner of packing.
W. M. EKEY.
Oney, Ill.

Brethren, whether you are interested or not in fine poultry or pigs, do not fail to send stamp for BRETHREN'S ILLUSTRATED CIRCULAR, giving special prices, and containing a likeness of a pair of Cochins, as bred by me, which I have had engraved at a large expense.

Write your name, Post Office, County and State very plainly and Address,

E. J. WORST,
ASHLAND, Ashland Co., O.

PLUM CREEK NORMAL SCHOOL,

Situated near

Elderton, Armstrong Co., Pa.

Winter Term opens Oct. 18th, 1875: Summer Term opens on the second Monday of April, 1876.

TUITION FOR FIVE MONTHS.

Primary Class.....	\$8.00
Teacher's Class.....	10.00
Higher Classes.....	12.00

Boarding from \$2.00 to \$2 50 per week. Persons clubbing together to board themselves, about one-half the above rates.

The location is a Healthy, rural place.

For further particulars, Address,

LOUIS KIMMEL, A. M.

ELDERTON, Armstrong Co., Pa.

TO THE AFFLICTED.

To the Brethren and Sisters and every body else.

The Undersigned offers to treat successfully anywhere in the United States or Canada.

Cancer, Dropsy, Rheumatism, Sick Headache, Neuralgia of the Head,

And any other curable disease incident to the human family; especially the first five as above named.

Address with stamp enclosed,

Dr. P. R. Wrightsman,
SOUTH BEND, IND.

"Evening at Home," a new monthly, (pamphlet form), devoted to Mental, Moral, and Physical Culture. Agents wanted. Samples six cents.

Address: **H. A. MUMAW, Publisher, Orrville, Ohio.**

The Children's Paper. This is a neat little paper for the children, filled with good reading and fine pictures. Twenty Five cents a year. No Postage.

Send Stamp for Specimen Copy.

Address: **H. J. KURTZ, Poland, O.**

ECLIPSES FOR THE YEAR 1876.

There will be four Eclipses this year, two of the Sun, and two of the Moon.

The first will be a partial Eclipse of the Moon, on the 10th of March, at 12 o'clock, 6 min. in the morning; visible. Beginning, March 9th, 11 o'clock, 38 min., eve.; middle, March 10th, 12 o'clock 39 min. in the morn.; ends, 1 o'clock, 38 min., morn. Duration, 2 hours. Three digits of the southern part of the moon will be eclipsed by the northern part of the earth's shadow.

The second will be an annular Eclipse of the Sun, on the 25th of March, at 4 o'clock, 6 min. in the afternoon; visible here as a partial eclipse. Begins 3 o'clock 2 min. in the afternoon; middle, 4 o'clock 8 min. in the afternoon; ends 4 o'clock 9 min. in the afternoon. Duration, 1 hour and 37 min. Will be seen as an annular Eclipse in the western part of North America and Pacific Ocean.

The third will be a partial Eclipse of the moon on the 3rd of September, at 3 o'clock 37 min. in the afternoon; invisible.

The fourth is a total Eclipse of the Sun on the 17th of September, at 4 o'clock, 35 min. in the evening. Invisible in the United States; visible on the Northern and Southern Pacific Oceans, and Australia.

MARS (♂) IS THE GOVERNING PLANET THIS YEAR.

CHARACTERS OF THE CONSTELLATIONS.

♈ Aries, the Ram.	♌ Leo, the Lion.	♐ Sagittarius, the Bowm.
♉ Taurus, the Bull.	♍ Virgo, the Virgin.	♑ Capricornus, the Goat.
♊ Gemini, the Twins.	♎ Libra, the Balance.	♒ Aquarius, the Butler.
♋ Cancer, the Crab.	♏ Scorpio, the Scorpion.	♓ Pisces, the Fishes.

ASTRONOMICAL CHARACTERS EXPLAINED.

☾ New Moon.	♊ Moon's ascending Node, or Dragon's Head.
☾ First Quarter, or Moon in general.	♋ Moon's descending Node, or Dragon's Tail.
☾ Full Moon.	☾ Moon's Ascension.
☾ Last Quarter, or Moon in general.	☾ Moon's Descension.
	☾ Moon in apogee, furthest from earth.
	☾ Moon in perigee, nearest to the earth.

PLANETS AND ASPECTS.

♄ Saturn,	♀ Venus,	♌ Conjunction, or planets in the same longitude.
♃ Jupiter,	☿ Mercury,	* Sextile, when they are 60 degrees apart.
♂ Mars,	⊕ Earth, ☾ Moon,	□ Quartile, when they are 90 degrees distant.
☼ Sun,	♃ Herschel.	△ Trine, when they are 120 degrees distant.
		♌ Opposition, when they are 180 degrees distant.

CHRONOLOGICAL CYCLES.

Dominical Letter	B A	Epact	4	Roman Indiction	4
Golden Number	15	Solar Cycle	9	Julian Period	6589

The year 5637 of the Jewish Era commences the 19th of September, 1876.

The year 1293 of the Mohamedan Era commences the 28th of January, 1876.

QUATEMBER, OR EMBER DAYS:

March 8. June 7. September 20. December 20.

40606

CENTENNIAL ALMANAC FOR 1876.

MARS IS THE RULING PLANET THIS YEAR.

THE YEAR IN GENERAL.—Under this planet the year is more dry than humid, and though there be frequent rains, yet it will be very dry.

SPRING.—In general will be dry, rough, and cold, with frost until the first of May; hence the sheep should not be put on the grain and meadows, as they will do more injury than good.

SUMMER.—Mars occasions, above all other planets, a hot Summer; and the heat of the Sun will be so great, that one can scarcely walk on the sand without shoes. The nights will be very warm and insufferable. Rivers, springs and wells will be very low.

FALL.—Will be more dry than humid, and grapes will yield much wine. Even if it does occasionally freeze in October, November will be warm throughout. There will be but little snow before the last of November.

WINTER.—Will be tolerably cold, dry, and changeable.

SPRING CROPS.—Barley sown in time on well manured land will yield well; but late sowing, on sand and heavy clay soil will produce little. All spring crops should be

well covered. There will be but little oats, yet very good. Corn, Buckwheat, Rice, and Tobacco will yield well. Potatoes, cabbage and turnips will be a medium crop. Hay and aftermath will be light, therefore sheep should be kept off the meadows.

FALL CROPS.—Rye will yield well, but wheat will be only a medium crop.

FALL SEEDING.—As the winter will set in late, early sowing will not be necessary.

FRUIT.—Pears will be a better crop than apples. Cherries and quinces will be very scarce. No acorns and but few nuts.

GRAPE CULTURE.—Grapes will be abundant, and the wine good.

THUNDERSTORMS, TEMPESTS.—In this year there will be but few storms and rain, but heavy thunder.

INSECTS.—Snakes and grasshoppers will be very numerous.

MOVEABLE FEASTS.

Septuagesima Sunday, February 13.
Quinquagesima Sunday, February 27.
Shrove Tuesday, February 29.
Ash Wednesday, March 1.
Palm Sunday, April 9.
Easter Sunday, April 16.

Ascension Day, May 25.
Whit Sunday, June 4.
Trinity Sunday, June 11.
Corpus Christi, June 15.
First Sunday in Advent, December 3.
Sundays after Trinity are 24 this year.

THE FOUR SEASONS OR CARDINAL POINTS.

Spring commences, Sun enters ♈ March the 20th, at 12 o'clock 36 min. morning
Summer commences, Sun enters ♋ June the 20th, at 9 o'clock 34 min. evening
Autumn commences, Sun enters ♎ Sept. the 22nd, at 11 o'clock 26 min. forenoon
Winter commences, Sun enters ♏ Dec. the 21st, at 5 o'clock 38 min. morning

Anatomy of Man's Body, as said to be governed by the Twelve Constellations.

Centennial Items.

As this year is the One Hundredth Anniversary of American Independence events that occurred one hundred years ago, will be of special importance and as we are just now in the Almanac business, it gives us pleasure to have lying before us an Almanac published in the year 1776 by brother Christopher Saur, of Germantown, Pa. It is the property of Bro. Abram. H. Cassel who kindly sent it to us that we might get some extracts from it.

The first page or frontispiece is of such peculiar design, that we failed to get its true signification. In the upper left hand corner there are a number of stars, the moon with clouds for a background. In the middle, top, there is a picture of a man, well supplied with wings, seemingly traveling on a rainbow, with a spear in one hand and in the other a banner with the inscription on it: "Kuemmerliche Zeiten." and in the other corner, "1776." In about the middle there is a city, showing a number of very high steeples, while further down there are two men apparently, on some kind of a deal.

In the left hand corner there is a man standing in a boat, and above or back of him are the ships of commerce, and in the right hand corner below, stands the picture of a dog. On page second is a register of the births of the rulers of Europe, and on the second title page we have the following:

"Der Hoch Deutch Americanische Kalender auf das Jahr nach der Gnadenreichen Geburt unseres Herrn und Heilandes Jesu Christi 1776.

Germantown: Gedruckt und zu finden bei Christopher Saur. Auch koennen die auswaertige Kraeener solche bei Mr. Reinhold und der Wittwe Ottn in Philadelphia haben, oder in Lancaster bei Ludwig Laumann, in New York bei Michael Hoffmann und anderen."

In it we find many things of interest, more perhaps on account of their antiquity than real value, but only give the following which will show that in some things, one hundred years has not made a very great change after all:

WHAT IS TO BE DONE BEFORE BLEEDING.

Above all this to remind that whoever wishes to be bled, it may be in the arm, in one hand or foot, the whole garment must, without fail be warm; but if it be cold, then the person to be bled, must walk rapidly, or drink hot drinks, so as first to warm the blood, else it will not flow at all, or only the thinnest, and such a bleeding would be more harmful than useful.

WHAT IS TO BE CONJECTURED FROM THE BLOOD AFTER BLEEDING.

(1) Beautiful red blood, covered with water, indicates good health. (2) Red and frothy, much

blood (or inflammation). (3) Red with a black ring, gout. (4) Black, frothy or purulent, bad humidity and cold discharges. (5) White blood is an indication of a collection of tough moist mucous (6) Blue, splenic pain or melancholy. (7) Green blood, heart-ache or acrid bile. (8) Yellow blood, pain in the liver and gall. (9) Watery, indicates a weak liver, or overflowing stomach. (10) Thick, hard and tough blood, is an indication of constipation or melancholy.

OF FELLING TIMBER,

Good Building timber is felled; when the Moon is decreasing under the Earth, in Taurus, Virgo, Capricornus in the best order, when the sap is out of the wood, that is in Dec. Who would cut to deaden trees, can do so in the spring before the sap rises, by cutting through the bark only, that the sap cannot rise; but who waits until the sap has risen, must cut entirely through the sap-wood.

FOR VERY GREAT THIRST IN FEVER

Cut a white onion in small slices, lay these in fresh spring water, and take then some slices and lay one on the tongue, and if it becomes hot and dry, take it away and take a fresh slice, this quenches not alone the hot thirst, but guards him against apprehension of an attack of Quinsy.

FOR THE EFFLON.

When applied early, very often a salve of hard soap, sage sap, and good Rum applied warm, will drive out the evil.

FOR POISON OF POISON IVY.

Take broad Plantain leaves; bruise, and mix them with cream, spread this on a cabbage leaf, and apply to the poisoned place: besides, senna physis will be very useful.

A SALVE TO STRENGTHEN THE NERVES.

Boil 5 handfuls sage in fresh butter, one quarter of an hour, strain through a cloth and anoint yourself with it.

OF DROPSY.

Of all domestic remedies the expressed sap of the Elder-root, has had the best results; take thereof morning and evening one, two, and if necessary more nutshells full, and use several times. Some have taken three handfuls of the middle bark of the elder, put in a pint (of water) and boil down to a half a pint, of this have given the half in the morning, and the other half in the evening. Here notice that you take of the last year's growth of the elder rind, if you desire it to purge upwards, you are to scrape the bark upwards, but if downwards, also to scrape downwards. When, however, the bowels are cleansed, and the water is carried away, then take the stalk of the Hog-bean, Broom, wild

[31 DAYS.

1st, 2nd, 3rd variable; 4th, 5th cloudy; 6th, 7th fair
8th, 9th, 10th cloudy snow; 11th, 12th, 13th cold; 14th,
15th variable; 16th, 17th snow; 18th, 19th, 20th, cold;
21st, 22nd moderate; 23rd, 24th snow; 25th, 26th coll-
est days: 27th, 28th snow; 29th, 30th, 31st variable.

oe (or grape vine,) green juniperwood, of each a quantity, burn each entirely to ashes; put of each a handful in a clean cloth, pour one measure of warm water over it, let it stand 24 hours, drink of it three times a day, each time a good drinking-glassful. This drink has a particularly good effect in carrying the water off through the urine; therefore I recommend this drink. Take swallow-wort of two handfuls, Beaver-clover, Wormwood, Love's-crop (or craw), Centaury, of each a handful, Camus one ounce. Pour over it good old wine, and drink each day a glass full thereof. H. B. B.

To our Patrons.

By this, dear reader, we again remind you that another year is numbered with the past and that we are now about entering another new period of time. Whether the future, for us, shall be an improvement on the past is for us to decide. Frank-
lin says: "If Time be of all things the most precious, wasting Time must be the greatest prodigality, since lost Time is never found again; and that we call Time enough always proves little enough." Never were truer words spoken and when we take a retrospective view, our prodigality ghtens us. O, the loss! *the loss!* Our buildings may burn, banks may suspend and our riches may take wings and fly from us; by labor, economy and the blessings of God, our wealth may be redeemed, but time once lost is lost forever.

Of the year that is now past much might be said, but our experience has recorded its history, and we turn the page over with the consciousness that if the record is not good the fault was our own, a kind and beneficent God freighted it with blessings entirely sufficient for all our wants.

The present year, 1876, is one of more than ordinary interest to the American people, being our centennial of national and religious liberty. For the hundred years we have enjoyed the blessings of a free and religious government, one that could have made us a happy, prosperous, grateful Christian people, and we hope and believe it is. During this period, our little Zion, under its present organization, has grown from one, to one hundred thousand and to-day we stand as a happy, lifted and prosperous people. God be praised for his goodness and tender mercies towards the children of men.

With this introduction, we now present to you our Almanac for 1876, and hope it may be a welcome and useful guest to the home and fireside of every Christian family in the land. Whether this is considered an improvement on the last we cannot tell, we have endeavored to make it so, and in these respects we think we have succeeded.

The Ministerial list has been greatly reduced by using smaller type and thus gives more room for reading matter which we have tried to make as interesting as our means and facilities would afford.

Thanking you, Christian friends, for your liberal patronage, timely assistance and hearty cooperation, we now wish you a happy and prosperous year, and that by the grace of God, we may be enabled to spend it to His honor and glory and our salvation,
H. B. B.

Mount Sinai.

The exact location of this memorable spot, sacred in the minds of all Christian people as the place where Jehovah appeared to man in fire; where the Ten Commandments were written by the finger of the Lord upon two tables of stone and delivered to Moses—has always been unsettled. But a Cable telegram announces that all doubt is now removed. Dr. Beke, the celebrated scholar and traveler, gives as the result of his recent expedition the discovery of Sinai and the finding of verifying inscriptions, of which he has made copies. The cable dispatch says that the expedition places the holy mountain at "a day's journey northeast of the village of Akaba, Arabia, at an altitude of five thousand feet above the level of the sea."

Dr. Beke has long maintained that Sinai was an extinct volcano, and the correctness of that opinion is now said to be fully confirmed by his personal explorations. Indeed, the Biblical account of the manifestations, which took place at Sinai in the presence of the tribes of Israel, corresponds in several respects to the descriptions given in these modern times of the volcanic eruptions of Vesuvius. In the nineteenth chapter of Exodus the following graphic narrative is presented:

"And it came to pass on the third day in the morning that there were thunders and lightnings, and a thick cloud upon the mount, and the voice of the trumpet exceeding loud; so that all the people that were in the camp trembled.

And Moses brought forth the people out of the camp to meet with God; and they stood on the nether part of the mount.

And Mount Sinai was altogether on a smoke, because the Lord descended upon it in fire; and the smoke thereof ascended as the smoke of a furnace, and the whole mount quaked greatly"

MOON'S PHASES.

First Quarter the 2nd, at 8 o'clock 12 min., evening; N. W. cold.

Full Moon the 9th, at 12 o'clock 5 min., afternoon; snow.

Last Quarter the 16th, at 11 o'clock 14 min., evening; cold.

New Moon the 25th, at 12 o'clock 38 min., morning; fair.

CONJECTURES OF THE WEATHER.

1st, 2nd, 3rd N. W. cold; 4th, 5th snow; 6th, 7th, 8th cold; 9th, 10th snow; 11th, 12th rain and snow; 13th cold; 14th cold; 15th 16th, 17th N. W. cold; 18th, 19th, 20th cloudy; 21st, 22nd, 23rd stormy; 24th, 25th fair; 26th 27th rain; 28th, 29th cold.

VENUS is Evening star till the 14th of July; then Morning star to the end of the year.

SATURN is in Conjunction with the Sun, on the 17th of this month, and cannot be seen.

Moses then went up the mount, and the Ten commandments were proclaimed; the inspired narrator adds:

"And all the people saw the thunders, and the noise of the trumpet, and the mountain smoking; and when the people saw it, they removed and stood afar off."

Subsequently it will be remembered, the Israelites forgot their vows and went back to heathen practices of idol making, and set up a metallic calf. Moses, on coming down from the mount, had the tables of stone in his two hands; and when he saw the molten calf, he threw down the tables and broke them in pieces. Then he broke up the idol. It crumbled into fine dust, which he scattered in a look that came down from the mount. The inspired narrator then tells us how, by prayer, the Lord was appeased, and he commanded Moses to hew out another pair of tables, and take them up to the mount, which he did. Whereupon the Lord again wrote out the same ten commandments as at first, and gave the two new tables to Moses, who brought them down from Sinai and put them in an ark which he had made of shittim wood, "and there they be," Deut. 10: 5.

It would be interesting to know what kind of stones are conveniently found at Sinai, out of which Moses might have hewn the tables. From their light weight, indicated by his carrying one in each hand, going up and down the mountain, it would seem as though they might have been composed of slate or other laminated formation. We presume that Dr. Beke's report will give full particulars of the geology of the neighborhood, and perhaps tell us something new about the Mosaic ones.

Curious Scientific Facts

A slight blow is sufficient to smash a whole pane of glass, while a bullet from a gun will only make a small round hole in it; because in the latter case the particles of glass that receive the blow are torn away from the remainder with such rapidity, that the motion imparted to them has no time to spread further. A door standing open, which would readily yield on its hinges to a gentle push, is not moved by a cannon ball passing through it. The ball, in passing through, overcomes the whole force of cohesion among the atoms of wood, but its force lasts for so short a time, owing to its rapid passage, that it is not sufficient to affect the inertia of the door to an extent to produce motion. The cohesion of the part of the wood cut by the ball would have borne a very great weight laid quietly upon it; but suppose the ball fly at the rate of twelve hundred feet in a second, and the door to be one

inch thick, the cohesion being allowed to act for only the minute fraction of a second, its influence is not perceived. It is an effect of this same principle that the iron head of a hammer may be driven down on its wooden handle by striking the opposite end of the handle against any hard substance with force and speed. By this very simple operation the motion is propagated so suddenly through the wood of the handle, that it is over before it can reach the iron head, which, therefore, by its own weight, sinks lower on the handle at every blow, which drives the handle up.

Dress in the Sunday School Teacher.

Surely among religious people this subject should engage more serious attention than it generally does, and especially as it affects the influence of the Sunday-school teacher. What, we may ask, will be the natural effect of a gaily-dressed teacher upon the minds of the little group whom she has gathered round her? She may diligently and orthodoxly expound to them the "sermon on the mount," or "the scheme of redemption;" but they will be admiring her artificial flowers, be twisting an imaginary ribbon into fanciful bows like hers, or be counting her flowers, her fringes, or her buttons; or they may be wishing, like a little girl I have heard of, that she was a "grown up woman to wear a dress like the ladies, to draggle." Round the tea-table at home, the young scholars will describe with interest the exact minutiae of the teacher's dress; but, alas for "the scheme of redemption,"—that will have gone in at one ear, and out at the other.—*Mrs. Sewell.*

AID.—I will here state a few items of the Brethren's Aid Society supplies to the destitute during the year 1875.

Supplies furnished the needy of Johnson Co., Mo. by the Brethren. Corn, about Five thousand Bushels. Flour, Forty-six thousand lbs. Meal, Forty-two thousand lbs. Molasses, Nineteen bbls. Beans, Twenty-five bbls. Hominy, Eleven bbls.

This includes the bulk of supplies furnished. A detailed statement would increase the amount specified. In the above statement, there is no allusion to the supplies sent by us to Henry, Bates, and Vernon Counties to the brethren.

Cornelia, Mo.

26th, 27th stormy, rainy; 28th, 29th, 30th, 31st fair.

The Inattentive Hearers.

A gentleman was once preaching to a large congregation, when his attention was attracted by a company near the door who annoyed him exceedingly. A young man was apparently doing something with his hands, which the others were intently serving. The young man did not look up to him, but seemed absorbed in the work he had in hand. The others were equally interested, as was plain from their speaking countenances, which often beamed with a smile of satisfaction. As he went on he puzzled himself to know what they could be doing, but all in vain. One thing, however, he was fully decided upon. Their behavior was very irrelevant in the house of God, and highly disrespectful to him. He felt some resentment toward those who should so trifle while he was delivering so solemn a message from heaven to them. He was surprised to see them linger after service, and still more when a friend introduced him to them. They were all from a deaf and dumb asylum and the young man who sat at the end of the seat had interpreted the sermon to them in the sign language. How were the feelings of the minister totally changed! How was he gratified to preach to those whose ears were sealed to all outward sounds! He shook the young man warmly by the hand and felt toward him like a brother beloved. He inquired how much of the sermon he was able to communicate to them and was answered, "Almost the whole of it."

The minister felt more than ever the importance of being slow to think evil of others, or to imagine the offenses were intended without very strong proof of it. Many others might recall this incident with profit when they feel the risings of resentment for some fancied ill-treatment. We are so apt to mistake ourselves, we should observe the widest charity in our opinions of the acts of others, thus doing only as we would be done by.

A Praying Machine.

Zwicky gives the following description of a praying-machine, used by the Tartars and the Japanese:—

"The *Kurdu*, or prayer-machine, consists of hollow, wooden cylinders of different sizes, filled with Tangut writings. The cylinders are painted with red stripes, and adorned with handsome gilt letters in the Sanscrit character, commonly making distinct sentence. Each of these is fixed upon an iron axis, which goes through a square frame. Some of these frames are capable of being shut up at, and are formed upon a small scale, much like weaver's shearing machine. In many of them,

where the lower parts of the frame cross, there is a hole in which the axis of the cylinder turns; by means of a string which is attached to a crank in the spindle, the machine can be kept in motion, so that the cylinder turns in the frame like a grindstone upon its axis.

These prayer-mills form a much more important service, in the estimation of those who use them, than a rosary, which is only intended to assist the person who prays; whereas those who use these machines believe that when set in motion, whether by the wind or otherwise, such writings as contain prayers and other religious documents, that the noise of these scraps of theology may reach to the gods, and bring down a blessing. To turn the prayer-machine round once is considered to be equivalent to the repetition of a prayer, and every turn of it multiplies the petition; so that the traveler with a powerful arm can repeat any number of prayers."

Oh, how our hearts should swell with gratitude to God, that we have a knowledge of the true and living God, to whom we can come and pray from the heart.

How and What to Read.

The intelligence of an individual is not always measured by the amount which he reads. A large amount of reading may in fact become hurtful, unless attended by a corresponding amount of thought. The following suggestions upon this subject, by Sir William Hamilton, are both interesting and valuable:

"Read much, but not many works. For what purpose, with what intent do we read? We read not for the sake of reading, but we read to the end that we may think. Reading is valuable, only as it may supply the materials which the mind itself elaborates. As it is not the largest quantity of any food taken into the stomach that conduces to health, but such a quantity of such a kind as can be digested; so it is not the greatest complement of any kind of information that improves the mind, but such a quantity of such a kind as determines the intellect to the most vigorous energy."

The only profitable kind of reading, is that in which we are compelled to think, and think intensely; whereas that reading which serves only to dissipate and divert our thoughts, is either positively

artful, or useful only as an occasional relaxation from severe exertion. But the amount of vigorous thinking is usually in the inverse ratio of multifarious reading. Multifarious reading is agreeable, at, as a habit, it is, in its way, as destructive to the mental, as dram-drinking is to the bodily health. "Our age," says Herber, "is the reading age;" and he adds, "It would have been better, in my opinion, for the world and for science, if instead of the multitude of books which now overlay us, we possessed but a few works, good and sterling, of which, as few, would be therefore more diligently and profoundly studied."

Too Old to Study.

Cato, at eighty years of age, commenced to study the Greek language.

Socrates, at an extreme old age, learned to play on musical instruments.

Dr. Johnson applied himself to the Dutch language but a few years before his death.

Ludovico Monaldesco, at the great age of one hundred and fifteen, wrote the memoirs of his own life.

Ogilby, the translator of Homer and Virgil was acquainted with Latin and Greek till he was past fifty.

Franklin did not fully commence his philosophical pursuits till he had reached his fiftieth year. Dryden, in his sixty-eighth year, commenced the translation of the *Iliad*, his most pleasing production.

Boccaccio was thirty-five years of age when he commenced his studies in polite literature; yet he became one of the greatest masters of the Tuscan dialects, Dante and Petrarch being the other two.

Sir Henry Spelman neglected the sciences in his youth, but commenced the study of them when he was between fifty and sixty years of age. After this he became the most learned antiquarian lawyer.

Old Age without Religion.

Alas! for him who grows old without growing wise, and to whom the future world does not set up her gates, when he is excluded by the present. The Lord deals so graciously with us in the decline of life that it is a shame to turn a deaf ear to the lesson which he gives. The eye becomes dim, the ear dull, the tongue falters, the feet totter, all the senses refuse to do their office, and from every side resounds the call, "Set thy house in order, for the term of thy pilgrimage is at hand."

The playmates of youth, the fellow laborers die away, and take the road before us. Old age is like

some quiet chamber, in which, disconnected with the visible world, we can prepare in silence for the world that is unseen.—*Tholuck*.

Dr. Hurst's "Outline History of the Church" gives the following population in the creeds of the world; Christianity, 407,000,000; Buddhism, 340,000,000; Mohammedanism, 200,000,000; Brahminism, 175,000,000; Confucianism, 80,000,000; Judaism, 7,000,000; all other forms of religious belief, 174,000,000. Of the Christian populations of the world, 131,007,449 are assigned to Protestantism, 200,339,390 to Roman Catholicism, and 76,390,340 to Oriental churches. In the New World, comprising North and South America, the Roman Catholics are in the majority, having 50,931,983 of population, to 36,936,800 of Protestants.—*Peterson's Journal*, Oct., 1875.

At a certain time, not long since, at an exciting revival, during a furious handshaking by the preacher, a brother, who chanced to be there was interrogated, "well, brother, do you love the Lord?" A moment's pause, and the brother responded, "I would rather you would find that out by asking my neighbors." The preacher "went his way, being condemned." D. E. BRUBAKER.

The Most Northern Town in the World.

If you take your maps and look on the northern part of Norway you may see the name Hammerfest there, in small letters, but if not, the town itself is situated in 70° 40" so that you will know very nearly where it is. Well, this little town of 2,057 inhabitants is said to be the most northerly one in the world. There are probably scattered individuals that live farther north, but no more northerly organized city or village.

The principle business of the people is fishing and the manufacture of cod liver oil, and the odor of the oil makes it a very disagreeable place to stay in, except for those who are used to it.

The sun sets there November 18th, and rises January 28th, so that the children have to go to school with lanterns, whenever the moon does not shine, for about six weeks. But then, again, to make up for it, in the summer the same sun rises June 1st, and does not set until July 22nd. We should think the poor little things would get be-

MOON'S PHASES.

Full Moon the 8th, at 4 o'clock 10 min., morning; cloudy, rainy.

Last Quarter the 16th, at 7 o'clock 44 min., morning; thunder showers.

New Moon the 23rd, at 9 o'clock 43 min., morning; fair.

First Quarter the 30th, at 12 o'clock 6 min., morning; clear, warm.

CONJECTURES OF THE WEATHER.

1st, 2nd clear; 3rd, 4th, 5th fair; 6th, 7th, 8th cloudy; rainy; 9th, 10th, 11th fair; 12th, 13th, 14th variable; 15th, 16th thunder-showers; 17th, 18th fair; 19th 20th, 21st showers; 22nd, 23rd fair; 24th, 25th thunder; 26th, 27th cloudy; 28th, 29th, 30th, 31st clear. warm.

JUPITER is in Opposition with the Sun the 17th of this month, and shines all night.

wildered and forget when to go to bed and when
 to get up. The long day must be about as un-
 pleasant as the long night. Still they manage to
 be as healthy and as happy as if they went to bed
 and arose with the sun every day, as you do, and
 would be as unwilling to change places with you as
 you would with them.

572 Their food, consists of fish and reindeer. Goats
582 and reindeers abound, but there are only six hor-
ses in the town

SAMARIA.

0:28 The Scriptural reminiscences connected with Sa-
1:2 maria are many and interesting. Here Ahab, at
2:28 the instigation of Jezebel, his wife, built a temple
3:28 and altar to Baal, (1 Kings 16: 32); herewith
4:30 the false prophets prophesied before him and Je-
5:28 zeshaphat, "in a void place in the entrance of the
6:28 gate of Samaria," and the true prophet Micaiah de-
7:28 nounced upon him speedy judgment of heaven; to
8:28 his place was his body brought and buried, "and
9:28 he washed the chariot in the pool of Samaria, and
10:28 the dogs licked up his blood," (1 Kings 23). Here
11:28 Jehu "slew all that remained unto Ahab in Sama-
12:28 ria," and then destroyed by stratagem all the wor-
13:28 shippers of Baal. (2 Kings, 10). The city was hon-
14:28 ored by the presence and miraculous deeds of Eli-
15:28 sha. Here this prophet healed Naaman, the Syrian,
16:28 of his leprosy, (2 Kings 5), and sending a messen-
17:28 ger hither, apparently from Dotham, disclosed to
18:28 the King of Israel the plans of the Syrian invad-
19:28 ers. (2 Kings, 6: 8—12). Here also he predicted
20:28 incredible plenty at a time of distressing famine.
21:28 (Chap. 7) After the outpouring of the Spirit on
22:28 the day of Pentecost, Samaria with its villages was
23:28 the first place without the limits of Judea that re-
24:28 ceived the gospel, (Acts, 8: 5—25), and it early
25:28 became the seat of a Christian Bishop.

Joyous, indeed, was the season when the grapes were plucked off, and carried to the wine-press, which was built in the vineyard, whose site was carefully closed in fields of a loose crumbling soil, on a rich plain, or a sloping hill, rising with a gentle ascent, or, where the acclivity was very steep, on terraces turned as much as possible from the setting sun. The wine-presses were either built of

stone, or hewn out of a large rock. The grapes were thrown into the upper part, to be trodden by men, and the juice flowed out into receptacles beneath. The treading of the wine press was laborious, but it was performed with singing, and sometimes accompanied with musical instruments.

Oil of olives was expressed the same way, before the invention of mills. The existence of this practice in Palestine, is evident, from the language of Moses: "Let Asher dip his foot in oil;" and from the threatening, "Thou shalt sow, but thou shalt not reap; thou shalt tread the olives, but thou shalt not anoint thee with oil; and sweet wine, but thou shalt not drink wine." Micah 6: 15.

To the custom of treading grapes and olives, reference is frequently made by the inspired writers. Thus the glorious conqueror, who appeared in a vision to Isaiah, said: "I have trodden the wine-press alone; and of the people there was none with me; for I will tread them in my anger, and trample them in my fury; and their blood shall be sprinkled on my garments, and I will stain all my raiment." Isa. 63: 3. As the clothes of the treaders were sprinkled with the juice of the grapes, so were the garments of the Redeemer with the blood of his enemies, who were as easily and completely crushed by his almighty power, as are the full ripe clusters of the vine, beneath the feet of men. The same figure is employed in the book of Revelation, 14: 18—20, to express the fearful destruction which awaits the adversaries of God and of man.

Origin of the Names of the Days.

The idols which our Saxon ancestors worshiped—from which the days of the week derive their names—were various, as were the principal motives to their adoption.

The Idol of the Sun.—This idol, which represented the glorious luminary of the day, was the chief object of their worship. It is described like the bust of a man upon a pillar, holding, with outstretched arms, a burning wheel before his breast. The first day of the week was especially dedicated to its adoration, which they termed the *Sun's doeg*, hence is derived the word Sunday.

The Idol of the Moon.—The next was the idol of the moon, worshiped on the second day of the week, called by them *Moon's doeg*; and since by us,

MOON'S PHASES.

Full Moon the 6th, at 6 o'clock 55 min., evening; fair.

Last Quarter the 14th, at 9 o'clock 33 min., evening; fair.

New Moon the 21st, at 4 o'clock 33 min., afternoon; clear.

First Quarter the 28th, at 9 o'clock 30 min., forenoon; cloudy.

CONJECTURES OF THE WEATHER.

1st, 2nd variable; 3rd, 4th cloudy; 5th, 6th fair;

7th, 8th, 9th variable, 10th, 11th thunder-showers;

12th, 13th, 14th fair; 15th, 16th cloudy; 17th, 18th,

19th showers; 20th, 21st, 22nd, 23rd, 24th clear;

25th, 26th cloudy; 27th, 28th, 29th warm; 30th cloudy.

Monday. The form of this idol is a short coat and a hood, having two long ears. The moon which he holds in her hand represents the quality.

The Idol of Tuisco.—Tuisco was first deified as the father and ruler of the Teutonic race, but in course of time he was worshiped as the son of earth. From this came the Saxon word *Tuisco's doeg*, which we call Tuesday. He is represented as standing on a pedestal, an old, venerable sage, clothed in the skin of an animal, holding a sceptre in his right hand.

The Idol of Wodin or Odin.—Wodin, or Odin, was the supreme divinity of the northern nations. This hero is supposed to have emigrated from the East, but from what country, or at what time, is not known. His exploits form the greater part of the mythological creed of the Northern nations, and his achievements are magnificent beyond credibility. The name of the fourth day of the week, called by the Saxon *Woden's doeg*, and by us Wednesday, is derived from this personage. Woden is represented in a martial attitude, with a broad sword uplifted in his right hand.

The Idol of Theor.—Thor, the eldest and the bravest of the sons of Woden and Friga, was, after his parents, considered the greatest among the Saxons and Danes. To him the fifth day of the week, called by them *Thor's doeg*, and by us Thursday, was consecrated. Thor is represented as sitting upon a throne, with a crown of gold upon his head, adorned with a circle in front, wherein were set twelve bright, burnished gold stars, and with a regal scepter in his right hand.

The Idol of Friga, or Frea.—Friga or Frea, was the wife of Woden, or Odin, and next to him, the most reverend divinity among the heathen Saxons, Danes, and Northern nations. In the most ancient times Friga or Frea, was the same with the goddess Hertha or Earth. To her the sixth day of the week was consecrated, which by the Saxons was written *Friga's doeg*, corresponding with our Friday. Friga was represented with a drawn sword in her right hand and a bow in her left.

The Idol Seater.—The idol Seater is represented on a pedestal, whereon is placed a perch, on the sharp prickled back of which he stood. His head was uncovered and his vision lean. In his left hand he held up a wheel, and in his right hand was a pail of water, wherein were flowers and fruits; and his dress consisted of a long coat, girded with linen. The appellation given to the day of his celebration is still retained. The Saxons named it *Seater's doeg*, which we call Saturday.—*Dr. Jeffers.*

The total number of human beings on earth is now computed in round numbers at 1,000,000,000. They speak 3064 now known tongues, and in which

upwards of 1100 religions or creeds are preached. The average age of life is $33\frac{1}{2}$ years. One fourth of the born die before they reach the age of seven years, and the half before the seventeenth year. Out of 100 persons only 6 reach the age of 60 years and upwards, while only 1 in 1000 reaches the age of 100 years. Out of 500 only one attains the age of 80 years. Out of the 1,000,000,000, living persons, 330,000,000, die annually, 91,000, daily, 3730 every hour, 60 every minute, and consequently 1 every second. The loss is, however, balanced by the gain in new births.

Age of Man.

But few men die of old age. Almost all die of disappointment, passion, mental, or bodily toil, or accident. The passions kill men sometimes even suddenly. The common expression, "choked with passion," has little exaggeration in it; for even, though not suddenly fatal, strong passions shorten life. Strong-bodied men die young—weak men live longer than the strong, for the strong use their strength, and the weak have none to use. The latter take care of themselves, the former do not. As it is with body, so it is with mind and temper. The strong are apt to break down, or, like the candle, to run, the wick burned out. The inferior animals, which live, in general, regular and temperate lives, have generally their prescribed term of years. The horse lives twenty-five years; the ox fifteen or twenty; the lion about twenty; the dog ten or twelve; the rabbit eight; the guinea-pig six to seven years. These numbers all bear a similar proportion to the time the animal takes to grow to its full size.

When the cartilaginous parts of the bone become ossified, the bone ceases to grow. This takes place in man at about twenty years, on an average; in the camel at eight; in the horse at five; in the ox at four; in the lion at four. in the dog at two; in the cat at eighteen months; in the rabbit at twelve; in the guinea-pig at seven. Five or six times these numbers give the term of life; five is pretty near the average; some animals greatly exceed it. But man, of all the animals, is the one that seldom comes up to his average. He ought to live a hundred years, according to his physiological law, for five times twenty are a hundred; but instead of that, the scarcely reaches, on the average, four

VENUS is inferior conjunction with the Sun, the 14th of this month, passes from Evening star to Morning star

es his growing period; whilst the dog reaches times; the cat six times; the rabbit even eight es his standard of measurement. The reason is ous—man is not only the most irregular and st intemperate, but the most laborious and hard- ked of all animals. He is also the most irrita- of all animals; and there is reason to believe, ugh we cannot tell what an animal secretly ls, man cherishes wrath to keep it warm, and umes himself with the fire of his own secret ections.—*Blackwood.*

The moral Danger of the Theatre.

I do not hesitate for a moment to pronounce the are to be one of the broadest avenues that lead destruction; fascinating, no doubt it is, but on t account the more delusive and the more dan- ous. Let a young man once acquire a taste for s species of entertainment, and yield himself up ts gratification, and he is in great danger of be- ing a lost character, rushing upon his ruin. the evils that can waste his property, corrupt morals, blast his reputation, impair his health, bitter his life, and destroy his soul, lurk in the elius of a theatre. Vice, in every form, lives l moves, and has its being there. Myriads have sed the hour when they first exposed themselves the contamination of the stage. Light and kness are not more opposed to each other than s Bible and the play-book. If the one be good, other must be evil. If the Scriptures are to be yed, the theatre must be avoided. The only y to justify the stage, as it is, as it has ever been, it is ever likely to be, is to condemn the Bible— same individual cannot defend both.

HANNAH MOORE.

Measure of Life.

Married people live longer than unmarried ones, d a tall man is likely to live longer than a short e. Until the fiftieth year women have a better ance of life than men, but beyond that period e chances are equal. 65 persons out of 1000 rry. The months of June and December are se in which marriages are most frequent. Chil- en born in the spring are generally stronger than ose born in other seasons. Births and deaths iefly occur at night. The number of men able ear arms is but one-eighth of the population. The nature of the profession exercises a great uence on longevity; thus out of 100 of each of e following professions the number of those who ain their seventieth year is—among clergymen, ; agriculturists, 40; traders and manufacturers, 33;

soldiers and clerks, 32; lawyers, 29; artists, 28; professors, 27; physicians, 24; so those who study the art of prolonging the lives of others are most liable to die early, probably on account of the ef- fluvia to which they are constantly exposed.—*Abeil- le Medicale.*

A short sketch of the origin and growth of Philadelphia.

This fine and prosperous city was founded by Wil- liam Penn, first proprietor of the province of Pennsyl- vania, and of the three lower counties now belong- ing to it, in the year of our Lord 1682; and grew so rapidly that in the year 1753 the dwelling hous- es therein numbered already 2300; and, accord- ing to a census taken in December 1769, the num- ber of residences amounted to 4474, independent of public buildings, warehouses, shops, &c.

If we assume the number of inhabitants of one house to be on an average eight, the population of Philadelphia would be shown to have amounted to 35,792.

From the weekly statements of the Custom House in reference to the ships coming in and going out, we plainly can see that this city could, in regard to commerce, compete with any within the British colony in America.—As early as the year 1753 the year mentioned before, there were 117 sea-ves- sels at one and the same time riding at anchor in the harbor of Philadelphia, and in the year 1771, 742 ships had left and about the same number ar- rived, most of which were owned by merchants of this place.

Of Public Buildings Philadelphia possessed the following: three English Episcopal churches, three Presbyterian churches, one Baptist church, two German Lutheran churches, and one stately school- house, boasting a spire and bells; then there were a new, commodious, and well proportioned Re- formed church, one Moravian church, one Metho- dist, and four Quaker meeting-houses; two Roman Catholic churches, and, about one mile distant from town, a Swedish Lutheran church. Further- more must be mentioned the High-school or Acad- emy, the Town and Courthouse, in the first of which the Assembly used to meet; the provincial Hospital, the Workhouse and House of Correc- tion, one of the handsomest buildings in all Améri-

SATURN is in Opposition with the Sun, the 27th of this month, and shines all night.

besides the old one, a newly, very expensively, and strongly built prison. To these may be added Barracks, which during the late war were built for the accommodation of the military.

'Tis clearly to be seen, that this city increases considerably every year, not only in regard to her selling-houses, but also in the number of her public buildings. There is now a German Seminary opened, superintended by the Evangelical-Lutheran ministers of this city.—*Philadelphia Almanac for the year 1776. printed by Henry Miller.*

A Page From History.

The following history of a community of Brethren near this place, Morgantown. I find in an old story of the early settlement of whites, and send you for publication in the Almanac for 1876, as it is something worth preserving and remembering:

"About the year 1754, Dr. Thomas Eckarly and his two brothers came from Pennsylvania, and camped at the mouth of a creek, emptying into the Monongahela, eight or ten miles below Morgantown. They were Dunkards, and from that circumstance, the watercourse on which they fixed themselves for awhile, has been called Dunkard's Creek. While their camp continued at this place, these men were engaged in exploring the country; and ultimately settled on Cheat River, at the Dunkard bottom. Here they erected a cabin for their dwelling, and made such improvements as enabled them to raise the first year, a crop of corn sufficient for their use, and some culinary vegetables, their sons supplying them with an abundance of meat, of a flavor as delicious as the refined palate of a modern epicure could wish. Their clothes were made chiefly of the skins of animals, and were easily procured, and although calculated to give a grotesque appearance to a fine gentleman in a city drawing-room; yet they were particularly suited to their situation, and afforded them comfort.

Here they spent some years entirely unmolested by the Indians, although a destructive war was then raging, and prosecuted with cruelty, along the whole extent of our frontier. At length to obtain an additional supply of ammunition, salt and furring, Dr. Eckarly left Cheat, with a pack of furs and skins, to visit a trading post on the Shenandoah. On his return, he stopped at Ft. Pleasant, on the South Branch; and having communicated to its inhabitants the place of his residence, and the length of time he had been living there, he was charged with being in confederacy with the Indians, and probably at that instant a spy, examining the condition of the fort. In vain the doctor protested his innocence and the fact that he

had not even seen an Indian in the country; the suffering condition of the border settlements, rendered his account, in their opinion, improbable, and he was put in confinement.

The society, of which Dr. Eckarly was a member, was rather obnoxious to a majority of the frontier inhabitants. Their intimacy with the Indians, although cultivated with the most laudable motives, and for noble purposes, yet made them objects at least of distrust to many. Laboring under these disadvantages, it was with difficulty that Dr. Eckarly prevailed on the officer of the Fort to release him, and when this was done, he was only permitted to go home under certain conditions—he was to be escorted by a guard of armed men, who were to carry him back if any discovery were made prejudicial to him. Upon their arrival at Cheat, the truth of his statement was awfully confirmed. The first spectacle that presented itself to their view, when the party came within sight of where the cabin had been, was a heap of ashes. On approaching the ruins, the half decayed, and mutilated bodies of the poor Dunkards, were seen in the yard; the hoops, on which their scalps had been dried, were there, and the ruthless hand of desolation had waved over their little fields. Doctor Eckarly aided in burying the remains of his unfortunate brothers, and returned to the fort on the South Branch."

History of the Septuagint.

The *Septuagint* is the Greek version of the Old Testament. Justin Martyr, one of the Christian fathers, who was born in the early part of the second century, gives the following account of the origin of the Septuagint:

"But if any one says that the writings of Moses and of the rest of the prophets were also written in the Greek character, let him read profane histories, and know that Ptolemy, king of Egypt, when he had built the library in Alexandria, and by gathering books from every quarter, had filled it, then learnt that very ancient histories, written in Hebrew happened to be carefully preserved; and wishing to know their contents, he sent for seventy wise men from Jerusalem, who were acquainted with both the Greek and Hebrew languages, and appointed them to translate the books; and that in freedom from all disturbance they

27th stormy; 28th, 29th, 30th variable.

ight the more speedily complete the translation
e ordered that there should be constructed, not
the city itself, but seven stadia off, (where the
haros was built) as many little cots as there were
anslators, so that each by himself might complete
s own translation; and enjoined upon those offi-
ers who were appointed to this duty, to afford
hem all attendance, but to prevent communica-
on with one another, in order that the accuracy
f the translation might be discernible even by
their agreement. And when he ascertained that
e seventy men had not only given the same
eaning but had employed the same words, and
ad failed in agreement with one another not even
to the extent of one word, but had written the
ame things, and concerning the same things, he
as struck with amazement, and believed that the
ranslation had been written by divine power, and
erceived that the men were worthy of all honor,
s beloved of God: and with many gifts ordered
hem to return to their own country. And having
s was natural, marveled at the books, and conclu-
ed them to be divine, he consecrated them in
hat library. These things, ye men of Greece,
re no fables, nor do we narrate fictions; but we
urselves having been in Alexandria, saw the re-
ains of the little cots at the Pharos, still preserv-
ed, and having heard these things from the in-
abitants, who had received them as part of their
ountry's tradition, we now tell to you what you
an also learn from others, and specially from those
rise and esteemed men who have written of these
things, Philo and Josephus, and many others.—
But if any of those who are wont to be forward
in contradiction say that these books do not belong
o us, but to the Jews, and should assert that we
a vain profess to have learnt our religion from
hem, let him know, as he may from those very
things which are written in these books, that not
o them, but to us, does the doctrine of them re-
er. That the books relating to our religion are
o this day preserved among the Jews, has been a
ork of Divine Providence on our behalf; for lest
y producing them out of the church, we should
ive occasion to those who wish to slander us to
harge us with fraud, we demand that they be pro-
uced from the synagogue of the Jews, that from
he very books still preserved among them it
might clearly and evidently appear, that the laws
hich were written by holy men for instruction
ertain to us."

J. Q.

Sunday Schools.

We suppose it will startle some of our brethren
when we tell them that the first Sunday School

ever introduced, was started by the Brethren, but
facts are stubborn things, when we wish to avoid
them, but in this one, we glory as it will effectually
remove that imaginary stigma cast upon the
institution by saying, "In this thing, like many
others, we are patterning after the world." Some
of our early brethren manifested a zeal and spirit
of enterprise that ought now to put us to shame
when we see and learn how little we have done
and are now doing.

The great "*American Encyclopedia*," in their
account of the "Brethren" or "Dunker" Church,
says: "In the year 1740, or about that time, forty
years before the present general system of Sunday
School instruction was introduced, Robert Raikes
and Ludwig Hoecker, (Bro. Obed), established a
Sunday School which was maintained upwards of
thirty years."

This makes about 136 years since Sunday
Schools were introduced among the Brethren, and
where are we to-day?

We made an effort to get some statistics to show
the nature and extent of the Sunday School work
in the Church, but to a very great extent failed,
as but a few, out of the many schools that we
know of, reported, but as this is our "Centennial"
year of American Independence we will give
what we have, to show our brethren a hundred
years hence that we had not altogether forgotten
the labors of those who lived so long a time before
us. The following is an abridgement of the re-
ports received:

The Panther Creek Church Sunday School, Roan-
oke county, Ill., was organized in 1873, and now
shows the following attendance:

Scholars,.....	Average.....	65
Teachers,.....	"	12
Officers,.....	"	4
Visitors,.....	"	34

Total Attendance,..... 115

J. L. BROWN, Sec'y.

Spring Mount Church Sunday School, organ-
ized December 13, 1874, with the following attend-
ance:

Scholars,.....	99
Teachers,.....	8
Officers,.....	8

Total,..... 115

ISAAC COX, Sec'y.

The Beech Grove Sunday School, Chippeway Church, Wayne county, Ohio, was organized April 10, 1871, and shows the following attendance:

Whole attendance, 101
The school seems to be in a promising condition with general good interest by all in attendance.

B. F. BAUSER, Supt.

Ogan's Creek Sunday School, Wabash county, Indiana, organized 3rd Sunday in May, 1875.

There are about 50 scholars in regular attendance. All are pleased with the school and are encouraged to continue the work, as seven of the scholars have resolved to serve the Lord in their youth. One brother says: "Before, my boys spent their spare time in play and quarreling, but now it is spent in reading their lessons, their papers and committing their verses."

North Manchester Ind. BY SECRETARY.

The Brethren's Sunday School in New Jersey, near Croton, Hunterdon county, was organized in May, 1873, with Elder R. Hyde, Supt., and at present shows an average attendance of about 30 scholars and 10 visitors, making a total average of 40, besides teachers and officers. We take 30 copies of the "Children's Paper," and six of our scholars have come into the fold within the present year.

A. S. CHMABERLAIN.

The Leamersville Church Sunday School, Blair County, Pa., was organized May 2, 1875. The school started with 23 male, and 13 female pupils, and the average attendance now is 24 males and 8 females, making a total average of 42 besides officers and visitors. The school, so far, is growing in favor both in and out of the Church and is considered a decided success.

Officers { Eld. JAS A. SELL, Superintendent.
D. D. SELL, Assistant.

SIMON SELL, Secretary.

We give this only as a beginning, hoping that by another year we may receive statistics from all the Schools in the brotherhood.

H. B. B.

Churches Organized.

We give the following as a sample of church reports we would like to have for our next Almanac:

The Lafayette Church, Allen county, Ohio, was organized in the year 1867. At present, has membership of 46, with the following speakers: Jacob L. Baker, in the second degree Henry M. Baker, in the first degree.

The report might be a little more complete, giving the names of the Elders present, when organized, etc.

H B B

District Report.

The Northern District of Iowa and Minnesota contains the following churches, with the name of the Presiding Elder of each one:

			No. OF MEMBERS.
Waterloo,	Iowa,	E. K. Buechley,	00
Waterloo South,	"	B. Buechly,	"
Coldwater,	"	J. F. Ikenberry,	"
Rock Grove,	"	Wm. Bauman,	"
Grundy,	"	Henry Strickler,	"
Root River,	Minnesota,	J. Ogg,	"
Lake Branch,	"	S. Oblinger,	"
Winona,	"	C. T. Wirt,	"

In connection with the above report we would like to have the number of members belonging to each Church. This can be obtained by the Secretary of the District Meetings during the time they are in session, as the delegates from the several churches can give the number of members in their respective churches.

H. B. B.

District Meeting.

The District Meeting for the State of Michigan, will be held, the Lord willing, with the brethren in the Woodland district, on Thursday, three weeks before Whitsuntide. JOSIAH G. WINEY, Clerk.

The Districts of the States.

The Brethren in the States are divided into twenty-four Districts, as follows:

MARYLAND:

Eastern and Western.

PENNSYLVANIA:

Eastern, Middle and Western. The Eastern District embraces the State of New Jersey.

VIRGINIA:

Number 1, and Number 2.

WEST VIRGINIA:

One District.

OHIO:

North-Eastern, North-Western, and South-Western.

INDIANA:

Northern, Middle, and Southern.

The New Crop.

The new crop of Roots, Herbs, Leaves and Seeds is about to be gathered by our old and experienced Botanists. The season (Sept. 1875) has been quite favorable and I shall lay in a larger stock than usual, owing to the fact, that this year all my agents or salesmen seem to have made special efforts to still further introduce my medicine, hence, I am beginning to look around for additional help in 1876, to push the work still further during the centennial year of American Independence, when I hope (all things favorable) to double the sale of Dr. Fahney's Celebrated Blood Cleanser or Panacea, which was first introduced by my grandfather nearly one hundred years ago, and has a most remarkable history, which I will send to any one who may desire a copy FREE.

War, Fire and Panics

I have been against me in the past, nevertheless I aim to push this noble work until it is known to every family on this continent, and trust that those who worked with me in the past so manfully will continue in the future and encourage others to do likewise.

SEND FOR CATALOGUE.

For one year from the 1st of July, 1875, I will sell **Fahney's Celebrated Blood Cleanser or Panacea**, ten per cent. less than the regular whole-sale price, to agents and others living in the grasshopper districts. I will sell to Farmers or Mechanics, or any one else at wholesale, but not less than five dollars. I will not discriminate, I do not write and say there are so only to the world, for we all know that only too well, but rather try and discriminate between a true business man and a sharper. I aim to deal as honorably and as promptly with those in a foreign country as I do with those in our own neighborhood—for profit, terms and business conditions—write on postal card, to **Dr. P. FAHNEY, Chicago, Ill.**

THE JEWISH PASSOVER, and the LORD'S SUPPER.

Containing a Treatise on Time as reckoned and used by the Sacred Writers; an Exposition of the Law relating to the Observance of the Jewish Passover; showing that this Typical Feast of the Jews was completely fulfilled in Christ. It assumes and proves that

Christ did not eat the Passover in the Night of his Betrayal,

but that he instituted the Lord's Supper, an Evening Meal, to be observed by his Disciples, in Connection with Feet-washing and the Communion, until he comes again. It contains more

Scriptural and Historical Evidence

on this Subject than can elsewhere be found in one Book.

Every Minister should have it.

Every Member should have it.

Every one who would like to understand this Subject should not fail to secure a Copy of this Work.

The work contains 258 pages, clear, open type, on good white paper, bound in fine English Cloth. Price \$1.00. Address:

PILGRIM PUBLISHING HOUSE,

THE PILGRIM.

Is a RELIGIOUS WEEKLY, published by H. B. & J. B. Brumbaugh, devoted to the promotion of Primitive Christianity and to the interests of *The Church of the Brethren*. It will advocate in the spirit of love and liberty, the principles of true Christianity, labor to promote peace among the people of God, for the encouragement of the saint and for the conversion of sinners.

THE PILGRIM has now been before the Brotherhood for the last six years, and has been steadily gaining in circulation and the confidence of the Brethren.

OUR WRITERS are among the acknowledged talent of the Church. In addition to the large number of brethren who contribute to our columns we take pleasure in announcing names of the following sisters who have been contributing, and will continue to contribute for the PILGRIM:

JULIA A. WOOD, MATTIE A. LEAR,
CHARLOTTE T. BUND, MARGARET DEARDORFF,
HANNAH KNAUFF, LAURA H. MILLER.
MARTHA J. TROXEL, REBECCA B. FLOCK,

and many others that we cannot now remember. Besides all this, we have a large number of reporters who are doing good service in sending us news items from all parts of the brotherhood which is giving universal satisfaction. This feature will be continued and extended until every church is represented from the Atlantic to the Pacific, in short, any thing and every thing that can be done for the well being and consolation of the saint and sinner, we will endeavor to do through the pages of the PILGRIM.

OUR TERMS.

The Subscription price of the PILGRIM is \$1.60, postage paid. To our agents we allow 10 per cent. for all over five and under ten. All over ten we allow the agent 20 CENTS ON EACH NAME.

SPECIAL OFFER.

Ministers and others who intend traveling considerably among the Members and will make it part of their business to solicit subscribers for the PILGRIM we will send them special terms on application.

AGENTS WANTED.

We desire an agent for the PILGRIM in every congregation in the brotherhood. Where there are none, some brother or sister will please send for sample copy, prospectus, &c., which we will send you by return mail.

BOOKS FOR SALE.

In the book line we can supply our readers with anything they may wish, Bibles, Testaments, Bible Dictionaries, Commentaries, Sunday School books and papers and all other books that may be desired. We also keep for sale the Brethren's Hymn Books and all other books published by the Church. All books sent at publishers' prices. Send 3 cent stamp and get our price list of good and useful books. THE PRIMITIVE CHRISTIAN

Is published every Tuesday at \$1.60 a yr., postpaid.

This periodical was formerly called the *Christian Family Companion and Gospel Visitor*. With the change of name, the paper is enlarged and otherwise improved.

THE PRIMITIVE CHRISTIAN

Is devoted to the defense and promotion of Primitive Christianity, as held and practiced by the *Church of the Brethren, or German Baptists*.

They accept the New Testament as the only proper rule of faith and practice, and hold to the observance of all its commandments and doctrines; among which are Faith, Repentance, Baptism by Trine Immersion, Prayer, the Washing of the Saints' Feet, the Lord's Supper, the Communion, Non-resistance, Non-conformity to the world, and the Perfecting of Holiness in the fear of the Lord.

As space will permit, some attention will be given to such secular matters as may be judged instructive to our readers.

Subscriptions may begin at any time. For further particulars send for a specimen number. Address,
